

Prestige Cast

ARCHITECTURAL CAST STONE SERIES

MODERN FEEL. MASS APPEAL.

PRESTIGE CAST IS A PREMIER CAST STONE PRODUCT LINE IN THE JOHNSON CONCRETE PRODUCTS FAMILY OF ARCHITECTURAL MASONRY.

Prestige Cast Architectural Stone Series from Johnson Concrete Products is a premium ASTM C1364 cast stone structural and veneer product line with the look of limestone.

Produced in North Carolina on state-of-the-art machinery, it's the most cost effective cast stone for your next project.

Available in a range of earth tone colors, Prestige Cast is a modern, clean aesthetic for all building types.

NOTE: Actual colors may vary from current production runs. Always contact a Johnson Concrete Products sales representative for samples. The JCP color lab is available to work with clients in creating custom colors and matches.

SETTING THE STANDARD FOR QUALITY AND SERVICE FOR FOUR GENERATIONS.

Prestige Cast Architectural Stone Series delivers aesthetically inspired cast units in a variety of colors, shapes, sizes, and textures. Looking for that one of a kind color? The Johnson Concrete Products lab is available to work with clients in creating custom colors and matches.

Beyond the beauty is a legacy of performance and durability. Every Prestige Cast unit is manufactured with integral water repellent (IWR) that meets or exceeds ASTM E-514 requirements.

The Prestige Masonry line of cast products is backed by over 70 years of Johnson Concrete Products reputation for product quality and support.

“Our team can help you realize your aesthetic and performance objectives and tailor them to fit your vision.”
