

EVERLOC®

A Distinctive Hardscapes offering from Johnson Concrete Products

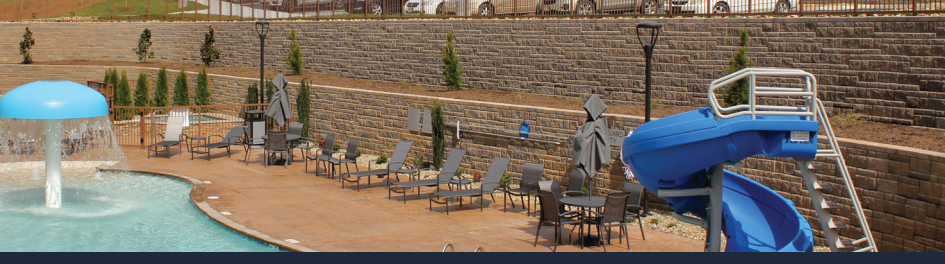

Johnson Concrete Products now manufactures EverLoc: an efficient, lightweight, and versatile segmental retaining wall system. The units come in 4" and 8" high options that can be combined to achieve multiple patterns, including the one-of-a-kind Gettysburg pattern (shown above). Installers love the user-friendly lug and groove interlocking mechanism and their light unit weights that help execute a quick installation. EverLoc can be used in various outdoor applications: kitchens, fireplaces, fire pits, flower beds, seat walls, columns, and accent walls.

Distinctive Hardscapes
OUTDOOR LIVING

Large enough to deliver.
Small enough to care.
Since 1947.
